

Steckbogen-IEC 90° ;    Ø25 mm ;    AL  
elbow-IEC 90°

Werkstoff:  
material:                    Aluminium 3.3206 EN AW-6060 T5

Oberfläche:  
surface:                    pressblank  
                                 mill finished

theor. Gewicht:            0,071 kg  
theor. weight:

Zur Herstellung von gesteckten 90° Eckverbindungen von zwei Steckrohre  
To produce ambitious 90° corner joints of two plain conduit

|                                                                                         |            |                                                              |                                                                                   |                  |               |
